Nathanael Jembere - Full Stack Developer

joejona14@gmail.com | +251913144860 | https://portfolio-jote.vercel.app | Addis Ababa, Ethiopia

Professional Summary

Full Stack Developer with 3+ years of experience building scalable, responsive web applications using modern technologies. Skilled in both frontend and backend development, API integration, and database design. Passionate about writing clean, maintainable code and delivering high-quality user experiences in agile environments.

Technical Skills

Frontend: React.js, Next.js, Angular, HTML, CSS, Tailwind, Bootstrap
Backend: Spring Boot, Node.js, Express.js, Django, Flask, RESTful APIs,
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Other: Git, Docker, Agile/Scrum, Postman, JWT Authentication
Programming languages: Java, JavaScript, TypeScript, Python
Familiar: Flutter, C#, Golang, Dart, PHP, C++, .NET, GIN

Experience

BrandCollab July 2024 – March 2025

Full-Stack Developer
Frontend

- Built and maintained a highly responsive and scalable Next.js (React) frontend.
- Developed reusable UI components to enhance user experience and maintain consistency across the platform.
- Optimized performance through lazy loading, code splitting, and efficient state management using Jotai and React Context API.
- Integrated third-party APIs and authentication flows, including Google OAuth and Firebase Authentication.

Backend

- Developed and optimized the Node.js backend using Express.js, ensuring high performance and reliability.
- Designed and implemented RESTful APIs for seamless communication between the frontend and backend.
- Built and maintained data models using MongoDB and Firebase, optimizing database queries for scalability.
- Ensured robust user authentication and data security using JWT

Superstars June 2024 – Oct 2024

Flutter Developer Intern

- Implemented the application UI and developed reusable custom widgets.
- Integrated third-party libraries to interact with the back-end API.
- Handling of widgets state properly to work with background data updates.
- Handling state management using the BLOC design pattern.

EthioClicks May 2021 - Jan 2024

Backend Developer

- Writing services api (rest APIs) on different projects.
- Involve in DB design & Write SQL scripts and generate Hibernate Entities and JPA repositories.
- Fix bugs and rewrite code of various components in the system.
- Test and modify JDBC APIs.
- Deploy applications to servers.
